

## Device Characteristics

Configuration	Port Identification	Fiber Type	Notes
Pump input port	Ports 1-3	105/125 um NA=0.22	
Output port	Port 4	220/242 um NA=0.22	

## Optical Performance Specifications

Parameters	Min.	Typ.	Max.	Units	PDR	Notes
Operating wavelength	800		1000	nm		
Maximum insertion loss - Pump			0.3	dB	Yes	1,2
Optical return loss - Pump	45			dB		1,2

## Mechanical and Environmental Specifications

Parameters	Value	Notes
Power handling	100 W/port	3
Maximum reverse pump light	10 W	
Dimensions	60.0mm x 12.0mm x 6.5mm	
Pigtail length	> 1000mm on all ports	

## Note(s)

- [1] Parameters are specified at room temperature  
 [2] Designed to be used at NA=0.17 (95% of energy within NA=0.15)  
 [3] Heatsinking is required, see application note on website

This part is considered under development  
 Specification subject to change without notice.  
 Made in Canada
